<a> SM2 : https://bitbucket.org/kuttyb_guest/sm2/overview

Distributed Test Execution Engine (Java). Started off as a hobby project but is now used by 3 teams at NVIDIA and staffed by 2 engineers.

<b> c_locks : https://bitbucket.org/kuttyb_guest/c_locks

High Performance synchronization primitives tuned for Linux/x86. ARM and SPARC port if I get the time

<c> Task Parallel Library : https://bitbucket.org/kuttyb_guest/task-parallel-library

CUDA style Task and Data Parallel Library in Java. Supports pipelined tasks, pipelined locks,

pipelined waitevents, threadpool, a new way to do Data Parallelism (not the regular Recursive Decomposition style recommended in literature)

<d> Java Locks : https://bitbucket.org/kuttyb_guest/java-locks-synchronization-primitives

Large variety of Locks tuned for better NUMA/various fairness expectations/Threaded Code test utilities The ticket lock algorithms are all mine .. will probably publish a few papers later when I get the time :-)
